

DO MORE. WITH LESS.

Transform one cart into many.

Dolly

Flat Cart

Drywall Cart

Stake Cart

Introducing the **Magnum Transformer Cart**, a do-all material cart that transforms into a variety of useful haulers. No tools required. Simply grab the handles you want and go. Handles stow flat into the frame when you convert to Dolly mode. Connect two units together to form a 10' train, or connect side by side to create a 5'X4' platform. Get ready to make the most out of your cart and move some serious material. Transform the way you work, and get more done with less.

DOA4X

Easily relocate handles to 6 available locations. Just pull them out and position for the ideal grip.

NO TOOLS NEEDED

You'll need to mount the casters, but once you're rolling the handles store in the frame with quick-release pins. There are six different handle mounting points. And yes, you can put a square peg into a round pole.

NEW! MAX-ENDURANCE POLYURETHANE CASTERS

These hard polyurethane casters have been designed to hold up to a 5400 LB load capacity when two carts are connected and the weight is distributed evenly.

NEW MAGNUM TRANSFORMER CART

46.5" L X 27" W X 48" H
(With casters and handles)

- Easily transforms this cart into a Dolly, Flat Cart, Drywall Cart & Stake Cart, without the use of tools.
- All handles store into frame to make transport and storage easy.
- High quality steel construction w/ durable powder coated finish
- Ability to connect two carts together end-to-end, or side-by-side.
- 8" Max-Performance Casters for a premium ride and excellent maneuverability, or 8" Max-Endurance Hard Polyurethane Caster to handle the heaviest of loads.

ITEM CODE	DESCRIPTION	LOAD CAPACITY	WEIGHT	PALLET/BOX COUNT	PURCHASE UNIT

 DOA4X-P	NYLON REPLACEMENT PLATE FOR DOA4X (DIMS. 46.5" X 14")	N/A	9 LB	10 BOX	1 PLATE

MATERIAL CART CASTER KITS

Part of our Pro Series offering, Max-Performance Casters and the Max-Endurance Casters are each designed to withstand daily punishment on the jobsite and provide increased performance and reliability. Max-Performance Casters are super smooth and easily maneuverable, whereas Max-Endurance Casters are hard Polyurethane and built to endure the heaviest of loads.

Max Casters are designed to distribute the load weight across the entire width of the hub, rather than focus the weight in the center of the hub. This principle design change means a longer lasting caster with increased performance, reliability and durability. These non-marking casters will not pick up debris from the floor surface or fall apart prematurely like the competitors.
